ADVANTAGES OF THE NEW 'ERAGON' SYSTEM TO TEST COMMON RAIL INJECTORS AND PUMPS COMPARED TO THE PREVIOUS SYSTEM WITH SIMULATORS CRI/CPT.

'ERAGON' characteristics:

1. *Test Pressure Capabilities over 1800 bar up to 2650 bar, as required by the newest injectors generation.*
2. *More accurate control on target pressure and speed, thanks to the new automatic 'PDI' control.*
3. *Increased oil volume in the Rail, with possibility to test heavy duty injectors, as L'Orange, MTU, Scania, Cummins, Caterpillar/Perkins, etc.*
4. *New Clamping system for injector testing, with wide fitting and position capabilities with counter pressure on injector base, similar to the fitting on the engine.*
5. *Smart-driver system allowing the testing of every single injector type with their specific original profile. Available also for new injectors expected to appear on the market in the near future.*
6. *Testing capabilities of the latest CRIN 4.2 double coil Bosch injectors and XPI Cummins.*
7. *New easy readable computer screen graphics, Multilanguage. PDF printable reports.*
8. *Operating with our 'Totem' metering device it allows a completely automatic test procedure, including the final test report. No operator assistance is required. Remote operation is also possible.*
9. *Possibility to check the exact nozzle closure point before the main injection on multijet injection systems.*
10. *Codification capability for injectors such as Delphi C2I - C3I – C4I, Denso 30 and Bosch IMA, Bosch Piezo and Siemens VDO.*
11. *Time response available for all injector types.*
12. *Variable impulse frequency allowing individual injector- testing, to avoid overheating.*
13. *Possibility to test phased pumps like Bosch CP2, Denso HP0 and Caterpillar/Perkins.*

DX74900 ERAGON BASIC KIT

COD.	ITEM	DESCRIPTION
DX97400 DX74306	 	DX97400 ERAGON CONSOLLE DX74306 CAN INTERCONNECTION CABLE
